

Long, Lucious Eyelashes - Naturally!

How to get long, lucious eyelashes . . . hydrated hair grows faster!

1. Dip a Q-Tip in same baby oil you see pictured
2. Rub the baby oil soaked Q-Tip around the base of your eyelashes
3. After applying the product to the base of your eyelashes, apply the baby oil to the actual lash with the Q-Ti. Be sure to completely cover your eyelashes - but not too much - it will get into your eyes. Do this every night before bed and morning before applying makeup!
